ONE-TIME GARDEN PROGRAM **1 HR / \$175***

Our staff will take you through a sensory exploration of your site's garden. Participants will get their hands dirty and help plant, weed, harvest, and water the garden.

SIX-WEEK SERIES **\$960***

Our six-week series will take you through the garden ecosystem to explore and identify the different inhabitants in a garden, different plant parts, and what plants need to grow. Participants will get their hands dirty and help plant, weed, harvest, and water the garden, as well as gain fundamental skills to tend the garden beyond this program.

*Please do not let the cost deter you from reaching out to us about these options. We are more than happy to work with you to make this an affordable program!
